

Trihedral Corner Reflector Data Sheet

RM-TCR203

Features

- Ideal for RCS measurement
- High fault tolerance
- Indoor and outdoor application

Descriptions

RF MISO's **Model RM-TCR203** is a trihedral corner reflector, which has a robust aluminum construction that can be used to reflect radio waves directly and passively back to the transmitting source and is highly fault-tolerant. The retroreflection of the reflectors is specially designed to have high smoothness and finish in the reflection cavity, which can be widely used for RCS measurement and other applications.

Specifications

RM-TCR203		
Parameters	Specifications	Units
Edge Length	203.2	mm
Finishing	Painted Black	
Weight	0.304	Kg
Material	Al
